PROFESSIONAL SUMMARY

MERN Stack Developer with 2 years of experience building responsive and scalable web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in REST API development, API integration, reusable components, CRUD operations, and frontend performance optimization.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript (Es6+), SQL
- **Frontend:** React.js, HTML5, CSS3
- **Backend:** Node.js, Express.js, API Integration, Middleware.
- **Database:** MongoDB, SQL, CRUD Operations, Schema Design.
- **Tools:** GitHub, VS Code, Git, Render.
- **Concepts:** Authentication, State Management, Debugging, Responsive Design, Object-Oriented Programming.

EDUCATION

Bachelor of Engineering in Electronics and Telecommunication

CGPA: 7.8/10

Dayananda Sagar College of Engineering, Bangalore

Dec 2021 – June 2025

Experience

Flamboyanz Software Pvt. Ltd., Bangalore (Currently Working)

Aug 2024 – Present

- Implemented assigned React pages and basic CRUD APIs under senior developer guidance, fixed 15+ bugs in the first 6 months.
- Developed and maintained scalable web applications using React.js, Node.js, Express.js, and MongoDB, following modular and reusable architecture.
- Troubleshoot application issues and resolved frontend, API integration, and data-handling problems during development and implementation.
- Followed reusable coding practices and modular development approaches to build maintainable and scalable application components.

Beekoder Pvt. Ltd., Bangalore (Internship)

Oct 2023 – Nov 2023

- Developed responsive user interfaces and job application forms using HTML, CSS, and JavaScript.
- Implemented clean layouts and interactive UI elements with a focus on usability and responsive design.

PROJECTS

TaskFlow – Workflow Management Web Application

- Developed full-stack features in a MERN application, building React.js UI, Express.js REST APIs and MongoDB schemas for task, user and reporting modules used by multiple users.
- Built reusable React components and responsive layouts, cutting duplicate UI code and keeping the UI consistent across modules.
- Took ownership of reporting module end to end requirements, UI, API, MongoDB and delivered it to production.
- Reduced dashboard load time by adding pagination, indexing MongoDB fields and removing unnecessary React re-renders.
- Fixed an API integration failure CORS and payload mismatch causing failed requests by tracing network calls, correcting server validation.
- Worked with 3 senior developers, QA team and the product team through daily standups, PR reviews and sprint planning.
- **Tech:** React.js, Node.js, Express.js, MongoDB, Mongoose, REST APIs, Git/GitHub. Used debounced search, indexed queries to reduce API calls and avoid full-collection scans.

Habitty Application (Live Demo)

- Developed a Python-based habit-tracking application with a minimalist interface and user login/password authentication.
- Implemented CRUD operations for creating, updating, tracking, and managing user habits.
- Structured application functionality using modular Python code to improve maintainability and usability.
- **Tech:** Python, HTML5

32-Bit MIPS Processor

- Designed a 5-stage pipelined processor to improve execution efficiency.
- Published an IEEE paper on processor design and performance analysis.
